

## Restrict visibility of content in Edinburgh Research Explorer

The University aims, whenever possible, to make staff research publicly available. However, it is acknowledged that there will be circumstances where this is not appropriate (e.g. commercially sensitive information, vulnerable subject groups etc.).

Visibility of content can be changed for each individual content type – scroll to the bottom of any template to find **Visibility** setting.

Simply select the desired level of visibility and **Save** the record. There are three visibility options available:

- **Public – no restriction**
- **Backend – restricted to PURE users**  
UoE research active staff + research support staff
- **Confidential – restricted to associated users and editors** (outputs/projects only)  
'Associated users' = co-authors / co-investigators  
'Editors' = research support staff within your unit
